

ADITI RAJAWAT

Full-Stack Developer • Data Analytics • Open Source Contributor

aditirajawat2911@gmail.com • +91-9399405583 • Noida, India • [linkedin/aditi-rajawat](#) • [github/aditi2911](#) • [aditiport.vercel.app](#)

SUMMARY

Developer with a full-stack project portfolio spanning React, Node.js, Spring Boot, and data analytics — built entirely outside formal software roles. Currently in a cross-functional tech role at a major firm while actively transitioning into software engineering. Active open-source contributor (GSSoC 2026, NSoC 2026), consistent GitHub history, and a track record of shipping real projects from scratch. Comfortable with AI-assisted development (Claude Code, Cursor) and eager to join a team where I can ship and grow fast.

EXPERIENCE

Associate — Cross-Functional Tech Operations • Wipro HR Services India Ltd.

July 2025 – Present

Non-technical role; engineering work is self-driven via projects below

- Work within a large-scale agile tech environment — cross-team collaboration, sprint workflows, delivery processes at enterprise scale
- Exposure to internal tooling, data operations, and software systems; full-stack development maintained in parallel

Open Source Contributor • GSSoC 2026 & NSoC 2026

April 2026 – Present

- Selected contributor for GirlScript Summer of Code (GSSoC) 2026 and Nexus Spring of Code (NSoC) 2026 simultaneously
- Merged PR #191 to NutriPlan Lite: loading state for AI coach responses, disabled send during processing, prevented duplicate submissions (React.js)
- Contributed to GEWO Health × NSoC Tech Challenge; active across multiple open-source repositories

PROJECTS

Real-Time Chat App | [github.com/aditi2911](#) • React.js • Node.js • Socket.IO • MongoDB • JWT

- Full-stack real-time chat platform with one-on-one messaging, JWT-based auth, and persistent chat history. Built Socket.IO backend for instant bidirectional communication without page reloads; deployed on Render for stable WebSocket support.

ShopPulse | [github.com/aditi2911](#) • Python • PostgreSQL • Pandas • Power BI • RFM

- End-to-end e-commerce analytics pipeline processing 96K+ orders. Built ETL flow from raw CSV into PostgreSQL, transformed with Pandas, and visualized in Power BI. Applied RFM segmentation and cohort analysis to identify high-value customers and churn risk.

TalentLens | [github.com/aditi2911](#) • PostgreSQL • MongoDB • Python • scikit-learn • Power BI

- HR attrition analytics platform with dual-source architecture (PostgreSQL + MongoDB) on IBM 1,470-record dataset. Built end-to-end ML pipeline using logistic regression; key finding: overtime employees are 2.9× more likely to leave.

Personal Portfolio | [aditiport.vercel.app](#) • Next.js • Three.js • Tailwind CSS • Vercel

- Fully responsive developer portfolio with 3D interactive animations built using Three.js. Optimized for high Lighthouse scores across desktop and mobile via asset compression, semantic HTML, and clean Next.js page structure.

SKILLS

Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux, Socket.IO, Three.js
Backend	Node.js, Express.js, Java, Spring Boot, Spring Security, REST APIs, JWT, Microservices
Data	Python, Pandas, NumPy, PostgreSQL, MySQL, MongoDB, Power BI, ETL pipelines, scikit-learn
DevOps	Docker, Vercel, Render, AWS, CI/CD, Git, GitHub, Postman, VS Code, IntelliJ IDEA
AI Tools	Claude API, Claude Code, Cursor — daily use for shipping faster

EDUCATION

BCA (Honours) — CGPA 8.4 • ITM University Gwalior, MP

Aug 2022 – May 2025

CERTIFICATIONS & ACHIEVEMENTS

- Google Cloud: Prepared Data for ML APIs (2025)
- Automated Data Capture with Document AI (2025)
- HackerRank: 5-Star Java
- GSSoC 2026 & NSoC 2026 — selected contributor across two open-source programs simultaneously
